Com, drive to a remote laptop and write the iso in its drives DVD, or use another computer to burn it for you. If you are running a Windows 7 or newer PC, you can download the ISO file of the ISO from Astro Vision website. You can also directly download the ISO file and use any dvd burning software to burn the ISO file directly. Once you have the ISO image of the ISO file, run it on a virtual machine, such as Microsoft Virtual PC or VMware virtual machine. If you have downloaded the ISO file through internet, you will see a window of the virtual machine has an ISO file on it. You will see the toolbar on top of the virtual machine. That tool bar is the windows that you are going to use. Use the ctrl + alt + left or right keys to turn the virtual machine on and off and to exit the virtual machine. If you don't have the ctrl and alt keys, then use a windows key to bring up the Taskbar, then click on the Windows Key to open the Start screen, then type ctrl + alt + left or right on the keyboard, and press the ENTER button to open the tool bar for the virtual machine. Click on the ISO icon on the tool bar. You will see that it will open a window of virtual machine and there you can see the CD or DVD image of the ISO file. Once you have the CD or DVD image open and selected, click on the Burn button at the bottom of the virtual machine's toolbar window to burn the ISO image. Once the image is burned, you can close the window of the virtual machine. Notes You will need to burn the ISO file to a DVD or CD first. If you have downloaded the ISO file from the internet, then you have to use a DVD burning software to burn it to a DVD first, then install the DVD to the PC, which is not so easy. If you have a DVD burner, then you may just copy the ISO file directly on a DVD and play it. If you do not have a DVD burner, the first step is to copy the ISO image to your hard drive and use a DVD burning software to burn it to a DVD.
